Renewing an IP Lease

When traveling to another campus or location, the IP information your PC has automatically picked up will not be valid for the campus you have traveled to. To correct this and gain network access at the campus you have arrived at, you need to renew your IP lease. Here’s how.

1. Click on the start button.
2. Click Run.
3. Type in winipcfg

You will get the following window:

4. Click on the arrow down arrow for the pull down menu at the top of the window.

5. Choose the other Adapter (ex: Intel® PRO PCI Adapter)
7. Click on the Renew All Button

* If you get an error connecting to the DHCP server, check the network cable and try again. If the problem persists, contact the Helpdesk

8. Click the OK button

9. You have now renewed your IP lease. You will need to reboot your PC in order to login to the network.

* These steps are necessary when returning to your home campus.
